It is semi synthetic motor oil meeting the latest technical standards developed for high performance motors and produced with the combination of cutting-edge-technology synthetic base oils with high performance additive. It is safely used during all four seasons in diesel latest Euro 6 and older generation motors, It also guarantees the optimization of the consumption, maintenance costs and schedules as it can be used also for low emission and CNG engines.

Properties

- Has high oxidation resistance. Prevents occurrence of rust and corrosion and provides maximum protection against motor wearing.
- Prevents occurrence of acid with its high TBN value and provides excellent protection. Provides economy by extending the service life of motor oil.
- Provides easier operation in lower temperatures with its outstanding viscosity and high viscosity indexes and prevents motor wearing at first starting moment.
- Reduces fuel consumption with its easy pumping and friction minimizing characteristics.
- Provides high performance with its Low Sulphated Ash, Phosphorus and Sulphur (Low SAPS) content in low amounts if used with Euro Diesel in Euro 4,5, and 6 motors with Exhaust Gas Recycling (EGR) system, Selective Catalytic Reduction (SCR) system, and designed to run 100% CNG.
